

BRAND GUIDELINES · EDITION 2025

The Brand Book

How we look, how we sound, and what the mark means. A reference for everyone building the Adaptive Technologies brand.

What's inside

01	Who we are	p.03
02	Positioning & promise	p.04
03	The logo	p.05
04	What the mark means	p.06
05	Construction & grid	p.07
06	Clear space & sizing	p.08

07	Logo variations	p.09
08	Misuse	p.10
09	Color	p.11
10	Typography	p.12
11	Voice & tone	p.13
12	Applications	p.14

We give Romanian small businesses the leverage that used to belong only to the big ones.

Adaptive Technologies builds practical AI and workflow automation for IMM-uri across Romania — the teams that were never meant to need an IT department, but are drowning in manual, repetitive work all the same.

We don't sell hype. We map the work a team actually does, automate the parts a machine should be doing, and hand back the hours. The result is simple to say and hard to argue with: **work smarter, not more.**

THE SHIFT WE DELIVER

70%

less time spent on manual, repetitive tasks after automation.

More capacity.
Same headcount.

Practical

Outcomes over buzzwords. If it doesn't save time, we don't ship it.

Honest

Clear about what AI can and can't do. No magic, no lock-in.

Local

Built for Romanian SMEs, in plain language, by people who answer the phone.

Measured

Every project carries a number. We track the hours we give back.

One sentence everyone should be able to say.

Adaptive Technologies helps Romanian SMEs **automate the busywork** with practical AI — so small teams get more done without growing headcount or buying tools they'll never fully use.

WHO IT'S FOR

Owner-led IMM-uri in Romania — services, trade, logistics, retail — with real volume but no in-house tech team.

WHAT WE DO

AI automation and connected workflows: the repetitive steps between your apps, emails, documents and data — handled.

WHY US

Plain Romanian, measured results, and a partner who stays after launch. Big-company leverage at SME scale.

The mark

Our logo is a single letter — the **A** of Adaptive. An open-footed form rising to a sharp apex: simple, geometric and confident. It is the one element that must appear on everything we make.

A is for Adaptive — and for the climb.

01

Ascent

Two lines rising to a single sharp peak — momentum, progress, “work smarter.” The whole company points upward.

02

Open to change

The foot is open, not closed off. A form that adapts — the posture of a business ready to evolve.

03

Engineered

Built on clean geometry, not decoration. Precision you can trust — the same way we build the automations behind it.

Built on a grid

The mark is drawn on a 100×100 unit grid. Keep these proportions exact — never redraw it by eye. Use the master vector file in every case.

Grid	100 × 100 u
Apex height	y = 12 u
Inner notch	y = 54 u
Baseline	y = 88 u
Stance width	80 u
Optical centre	x = 50 u

The apex sits slightly inside the bounding box and the legs reach the full width, so the mark reads optically centred rather than mathematically centred.

Clear space

Keep a margin of at least $\frac{1}{2}$ the **A's height** clear on every side. Nothing — text, edges, other logos — enters this zone.

Minimum size

Below these sizes the mark loses its crispness. Never go smaller.

DIGITAL

16 px

Mono light
White on dark

FAVICON & AVATAR

Always centre the mark in its tile with even padding. Rounded square for apps; circle only for social avatars.

Please don't

The mark only works when it's left alone. These are the six ways it breaks most often.

✗ Don't stretch or distort.

✗ Don't use off-brand colours.

✗ Don't rotate or tilt.

✗ Don't add shadows or effects.

✗ Don't outline the mark.

✗ Don't place on low-contrast or busy backgrounds.

Two colours do the work

Deep navy carries the brand; warm gold is the spark. Everything else is a quiet neutral. Keep the ratio roughly **70 navy / 20 neutral / 10 gold** — gold is a highlight, never a flood.

70 • NAVY

20 • NEUTRAL

10

Two typefaces

A confident geometric sans for everything people read, and a monospace for the technical voice — labels, data, code, captions. That contrast is part of the brand.

How we sound

Like a sharp colleague who respects your time: plain, honest, a little dry. We explain, we don't dazzle.

Clear > clever

Say the plain thing. Jargon is a tax on the reader.

Honest

Name the limits of AI. Trust is built on what we won't promise.

Outcome-first

Lead with the hours saved, not the technology used.

Calm

No hype, no urgency theatre. Confidence is quiet.

WE SAY

"This automation saves your team about 12 hours a week. Here's exactly what it does."

"AI handles the repetitive part. You stay in control of the decisions."

WE DON'T

"Revolutionary AI-powered synergy to disrupt your vertical."

"Fully autonomous. Set it and forget it. No humans needed."

The brand in the world

A few of the places the system comes together. Mockups for direction — swap in real photography when it’s ready.

Keep it simple. Keep it consistent.

One mark, two colours, two typefaces, one honest voice. Use them well and the brand does the rest.

Lucrați mai inteligent. **Nu mai mult.**
